point

1.

True or False: In Google Cloud IAM: if a policy applied at the project level gives you Owner permissions, your access to an individual resource in that project might be restricted to View permission if someone applies a more restrictive policy directly to that resource.

True

**This should not be selected**

Review the lecture "The Google Cloud Platform resource hierarchy." See also the [GCP documentation on the resource hierarchy](#).

False

1 / 1
point

2.

True or False: All Google Cloud Platform resources are associated with a project.

True

**Correct**

Correct! All Google Cloud Platform resources are associated with a project.

False

0.50 / 1
point

3. Getting Started with Google Cloud Platform

Service accounts are used to provide which of the following? (Choose all that are correct. Choose 3 responses.) **1.5/8 points (18.75%)**

☒

A way to restrict the actions a resource (such as a VM) can perform

Correct

Correct!

☒

Authentication between Google Cloud Platform services

Correct

Correct!

☐

A way to allow users to act with service account permissions

This should be selected

☐

A set of predefined permissions

This should not be selected

Review the lecture "Identity and Access Management (IAM) Roles."

0 / 1
point

4.

How do GCP customers and Google Cloud Platform divide responsibility for security?

☐

Google takes care of the higher parts of the stack, and customers are responsible for the lower parts.

☐

Google takes care of the lower parts of the stack, and customers are responsible for the higher parts.

☐

All aspects of security are the customer's responsibility.

☒

All aspects of security are Google's responsibility.

This should not be selected

Review the module introduction.

Quiz, 8 questions

5.

Which of these values is globally unique, permanent, and unchangeable, but chosen by the customer?

☐ The project's billing credit-card number

☒ The project name

This should not be selected

Review the lecture "The Google Cloud Platform resource hierarchy."

☐ The project ID

☐ The project number

0 / 1
point

6.

Consider a single hierarchy of GCP resources. Which of these situations is possible? (Choose all that are correct. Choose 3 responses.)

☒ There is an organization node, and there are no folders.

Correct

Correct!

☐ There are two or more organization nodes

This should not be selected

Review the lecture "The Google Cloud Platform resource hierarchy."

☒ There is no organization node, but there is at least one folder.

Un-selected is correct

☒ There is an organization node, and there is at least one folder.

Correct

Correct!

☐ There is no organization node, and there are no folders.

7.

What is the difference between IAM primitive roles and IAM predefined roles?

- ☐ Primitive roles can only be granted to single users. Predefined roles can be associated with a group.
- ☐ Primitive roles only allow viewing, creating, and deleting resources. Predefined roles allow any modification.
- ☒ Primitive roles only apply to the owner of the GCP project. Predefined roles can be associated with any user.

This should not be selected

Review the lecture "Identity and Access Management (IAM)."

- ☐ Primitive roles affect all resources in a GCP project. Predefined roles apply to a particular service in a project.
- ☐ Primitive roles are changeable once assigned. Predefined roles can never be changed.

0 / 1
point

8.

Which statement is true about billing for solutions deployed using Cloud Marketplace (formerly known as Cloud Launcher)?

- ☐ You pay only for the underlying GCP resources you use, with the possible addition of extra fees for commercially licensed software.
- ☐ You pay only for the underlying GCP resources you use; Google pays the license fees for commercially licensed software.
- ☐ Cloud Marketplace solutions are always free.
- ☒ After a trial period, each Cloud Marketplace solution assesses a fixed recurring monthly fee.

This should not be selected

Review the lecture "Cloud marketplace (formerly Cloud Launcher)."
