1.
When would you choose to have an organization node? (Choose all that are correct. Choose 2 responses.)

☑ When you want to create folders.

Correct
Correct! Folders require an organization node. Organization nodes are optional, but if you want to create folders, having one is mandatory.

☑ When you want to organize resources into projects.

Un-selected is correct

☑ When you want to apply organization-wide policies centrally.

Correct
Correct! Organization nodes let you apply policies centrally. Organization nodes are optional, but if you want to define policies that apply to all the projects in your organization, having one is mandatory.

☑ There is no choice; organization nodes are mandatory.

Un-selected is correct
